new edition of CIBSE Guide B was published in the form of five separate 'stand alone' books. In 2004, the decision was taken to produce Guide B as a single volume and this publication is the result. The technical content of this combined volume is the same as the five separate sections, with only minor editing to correct errors and to remove obvious duplication between sections.

The design of the heating system is based on the steady state heat loss of the building, or the heat output required to maintain comfort conditions within the building with an accepted external design temperature. The procedures for calculating space heating loads are described in Chapter 25 ASHRAE Handbook of Fundamentals (1993), the CIBSE Guide Section A3 (1980),
