Ever want to communicate more effectively with welding shop and plant personnel? This publication, written by a former welder and welding instructor for the U.S. Army, will help the IH who has little "hands-on" shop experience, particularly IH and safety students, IH and safety professionals with little or no practical background in welding health and safety, and welders and managers who need to identify and address the health and safety concerns of their operations. Major topics include health and safety considerations, welding terminology, equipment, welding and cutting in confined spaces, construction, maintenance, repair welding, and the health effects of metals, gases and other agents commonly encountered in welding processes. Enhanced by numerous figures provided by the American Welding Society.

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

Applying the principles in this book unleashes ingenuity that achieves, solidifies and perpetuates a new performance culture of mutual benefit. In this culture, project teams will prepare their work in task packages and enable workflow necessary to leave inefficiency of time and resource, literally, no place to hide. Project examples will help teams implement the principles that shorten cycle times, eliminate error, improve quality and reduce costs to succeed in meeting project commitments. Emerging Lean enterprise relationships between clients, EPC contractors and their entire supply chain will advance what constitutes the new, market-differentiating performance of individuals, project teams and companies - justifying high levels of trust and inter-organizational efforts to improve. Client executives will learn to recognize root causes of risk and sources of excellence to mitigate them. Well-developed strategic improvement is often constrained because the traditional way - current means and methods - fit squarely in everyone's comfort zone. By learning to ask the right questions, top-client leadership will soon render overruns from the best traditional systems as "not-good enough" and strive for a new level of excellence. EPC executives will better engage creative voices from their best resources and stakeholders to resolve all concerns and define a unified vision for how to deliver on clients' expectations without overruns during capital project delivery. Lean methods will effectively assure that vision, principles and best expectations are understood and implemented at the workplace. Department, discipline and stakeholder leaders will align and no longer frustrate each other and their clients. They will plan and execute with increased efficiency and effectiveness. Cost reduction will accelerate, retaining only client-valued quality - enabling a nimble response to market opportunities and threats. Project and program managers will confidently accept intense, market-induced cost and schedule-reduction efforts. They will apply new metrics, measure potential and extract, align and pilot improvements. They will make workface progress transparent to simplify resource balancing, full utilization and workface flow during all project phases. The results will differentiate team members and their project's performance on the world stage. Project professionals and the skilled labor force will gain confidence to make and keep increasingly difficult commitments and experience thereby increasing opportunity in an organization known for excellence. They will fully engage heart and mind for leaders who expect excellence and they trust to enable and reward best practice performance while they jointly eliminate root causes of problems before they happen. This book guides readers through each essential role for the transformation to Lean...not just at the lowest levels but of the entire business model and all the supporting processes. Resulting market recognition of sustained excellence of people, their systems and they way they work together will create a market-leading force.

When the Tokyo stock market collapsed, it became clear that the Japanese bubble had burst and the balance of world economic power had shifted. Now global business expert Burstein--bestselling author of Yen! and Euroquake--explains how America can use Japan's current economic crisis to forge a new and profitable economic alliance.
